ADVERTISING SYSTEMS

product catalog

In this catalog, you will find reliable products, most of them with replaceable prints, which are invaluable for events, trade fairs, and promotions in shopping centers or small service premises. In addition to the wide range of products we offer, we make sure that the solutions we propose are ready to use and as easy to assemble as possible. That is why you do not need a whole team of people to set up an advertising wall or lightbox. The assembly has also been adapted for people without experience who are responsible for the brand image on their own.

Key features of advertising systems

Cost-effective, reusable structures allow for graphic print replacement without the need to build a new frame.

Quick and tool-free assembly – most products require no additional tools.

Modularity – individual products in the range can be combined to create a cohesive and compatible configuration.

Sublimation printing on textiles – an eco-friendly method where the dye bonds with the fabric, providing vivid, long-lasting colors and detailed patterns on polyester textiles. The print is fade-resistant, durable, and environmentally friendly.

Exhibition systems that ensure no one walks past your brand unnoticed.

Modular and mobile advertising systems offer a versatile solution for professional brand presentation at trade shows, conferences, and outdoor events. The product range includes textile display walls, LED panels, exhibition booths, and more – all designed to meet the needs of our industries.

Thanks to many years of experience and in-depth industry knowledge, these solutions combine high quality with intuitive, innovative design. Advertising agencies, media houses, and business clients rely on these ready-to-use, dependable products to simplify event organization and brand communication.

User-friendly assembly is a top priority, making it easy for even inexperienced users to set up a display wall or light-box with minimal effort. The goal is to ensure practicality and ease of use without requiring large setup teams.

High standards and a constant search for innovation drive the development of these advertising solutions, delivering functionality, durability, and eye-catching design that help brands stand out at professional events.

Icon description

Each symbol has a unique meaning that symbolizes important features of the systems, such as their functionality, materials or special attributes.

This allows you to quickly and easily identify the most important attributes of the products offered, making it much easier to navigate through the catalog.

Construction type

The type of product construction, specifying the materials used, such as:

- Polyvinyl chloride (PVC)
- Aluminium (ALU)
- Medium-density fibreboard (MDF)
- Polyurethane (PU) foam
- Polyethylene (PE)
- Beech wood
- Fiberglass
- Polycarbonate (PC)
- Expanded Polystyrene (EPS)
- LED
- LCD

Material for print type

The type of material used in production, such as **textiles** or **PVC**, plays a crucial role in determining the product's durability, flexibility, and suitability for us environments and applications.

Printing method

The type of printing used in the product, such as sublimation or solvent, which affects the quality and durability of the graphics.

● Sublimation

Sublimation is a printing technique in which the dye transfers into the structure of the material, providing durable, intense colors and detailed designs, ideal on polyester fabrics. The print is resistant to fading and abrasion.

● Solvent

Solvent printing uses solvent-based inks for high durability and weather resistance, ideal for applications on materials such as PVC. Prints are resistant to fading, moisture and damage.

Construction mounting type

Free-standing

A free-standing product that does not require additional attachment to the wall or other structural elements.

Wall-hung

The product is designed for wall mounting, which saves floor space and increases design possibilities.

Suspended

The product is designed to be hung, ideal for display in spaces where the use of height is important.

Lighting

Edge lighting

Edge lighting mounted in the product frame, which adds elegance and a modern look to the product.

Back lighting

Illuminated by led strips mounted on a light curtain placed behind the print.

Assembly

Tool-free assembly

Allowing the product to be set-up quickly and easily without additional equipment.

Allen-key assembly

Included allen key allows for easy and quick installation of the product.

Pneumatic/self-folding

A product with a pneumatic or self-folding mechanism - one move is all it takes to fold and unfold the system.

Printings

All-sided print

Can be printed on all sides of the product for full personalization and visibility from any perspective.

Single-sided print

Single-sided printed product, ideal for applications where visibility is needed from one side only.

Double-sided print

A product with double-sided printing, allows the use of two different graphics, one on each side.

Silicon Edge System (SEG)

Graphic mounting system, allows the material to be easily and aesthetically secured to the frame by fitting the rubbers into the recess.

Washable printing

The product is made of materials that can be washed in the washing machine, which allows you to keep it clean.

Zipper

The product is equipped with a zipper that makes it easy to close and open for convenient use from one side only.

Specials

Bestseller

This is the most popular product among our customers, highly recommended for its reliability and performance.

Exclusive design

The product features a distinctive and exclusive design, crafted to stand out and offer something unique.

Multimedia

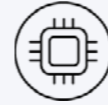

Android

Product compatible with Android, which allows easy integration with mobile devices and applications.

Touchscreen

The product features a touch screen for interactive operation and easy management of functions.

Built-in memory

Built-in memory in the product, allowing you to store data or settings without the need for external media.

Bluetooth

Bluetooth technology allows for the product to be connected wirelessly with other devices.

Wi-Fi

Wi-Fi module integrated into the product for wireless network connection and remote management.

Size parameters

Profile width

The width of the product profile, important in assessing its appearance and construction stability.

Diameter

It determines the diameter of the product's pipe, which ensures its weight or stability.

Packaging

Softbag included

Product comes with a carrying bag, made of soft material, for easy handling and protection of the product.

Miscellaneous

Reusable construction

A reusable design that can be used for many seasons, only replacing the print with graphics when needed.

Constant pressure

Product is designed to maintain a constant pressure for stability and reliability during use, without the need to inflate.

Modular

Design that allows combination and customization of individual systems. Several products can form a synchronized set.

With shelf

The product is equipped with a shelf, allowing you to store additional items.

Outdoor & indoor friendly

The product is designed for both outdoor and indoor use and is resistant to weather conditions.

Customization available

Possibility of full personalization of the product, tailored to individual customer needs (e.g. dimensions, shape, color).

Battery

The product is equipped with a battery, which allows use without constant power supply.

Wheelbag included

The product comes with a wheeled carrying bag, making it easy to carry and transport for long distances.

Textile display walls

Advertising walls are powerful promotional tools that use custom-printed graphics to effectively showcase your brand and products. They offer unlimited possibilities for presenting a brand, product, or idea – anytime, anywhere. The graphics are printed on textile materials, allowing for easy replacement depending on your needs. Thanks to the tool-free assembly, anyone can set them up without prior technical experience. Additionally, the prints are produced using an eco-friendly sublimation method, which ensures vivid, durable colors and high-quality visual presentation.

Applications:

- Photo backdrops
- Conference backdrops
- Office and service space decoration
- Trade show and exhibition areas

The perfect solution for:

- **Companies and corporations** looking to increase brand visibility at industry events
- **Small and medium-sized businesses** seeking an effective and portable solution
- **Advertising and marketing agencies:** a tool for running promotional campaigns
- **Event organizers:** eye-catching exhibition spaces.
- **Educational and cultural institutions:** showcase your initiatives and product displays with a strong visual presence.
- **Freelancers and creative professionals:** design your photoshoots, recordings, and webinars with stylish backdrops that reflect your personal brand.

Classic Light Display Wall

Textile walls with non-standard shapes

Textile walls are an interesting and eye-catching solution that stands out from traditional exhibition systems, thanks to their unique design and variety of shapes. These walls offer almost unlimited possibilities for creating space – the only limitation is imagination. Made from high-quality textile materials, the walls guarantee excellent color reproduction and clear details.

Applications:

- Trade shows
- Conferences and seminars
- Events and promotions
- Showrooms
- Galleries and exhibition spaces

Perfect solution for:

→ **Public offices and institutions** for creating unique displays that attract attention and promote activities in public spaces.

→ **Event organizers** who want to build memorable, creative booths that stand out from the rest.

→ **Businesses** for showcasing products and enhancing brand image at industry events.

→ **Shopping malls and galleries** who look for creating compelling displays that engage customers in commercial spaces.

→ **Educational institutions** for designing original booths for educational fairs, open days and other memorable events.

Lightboxes

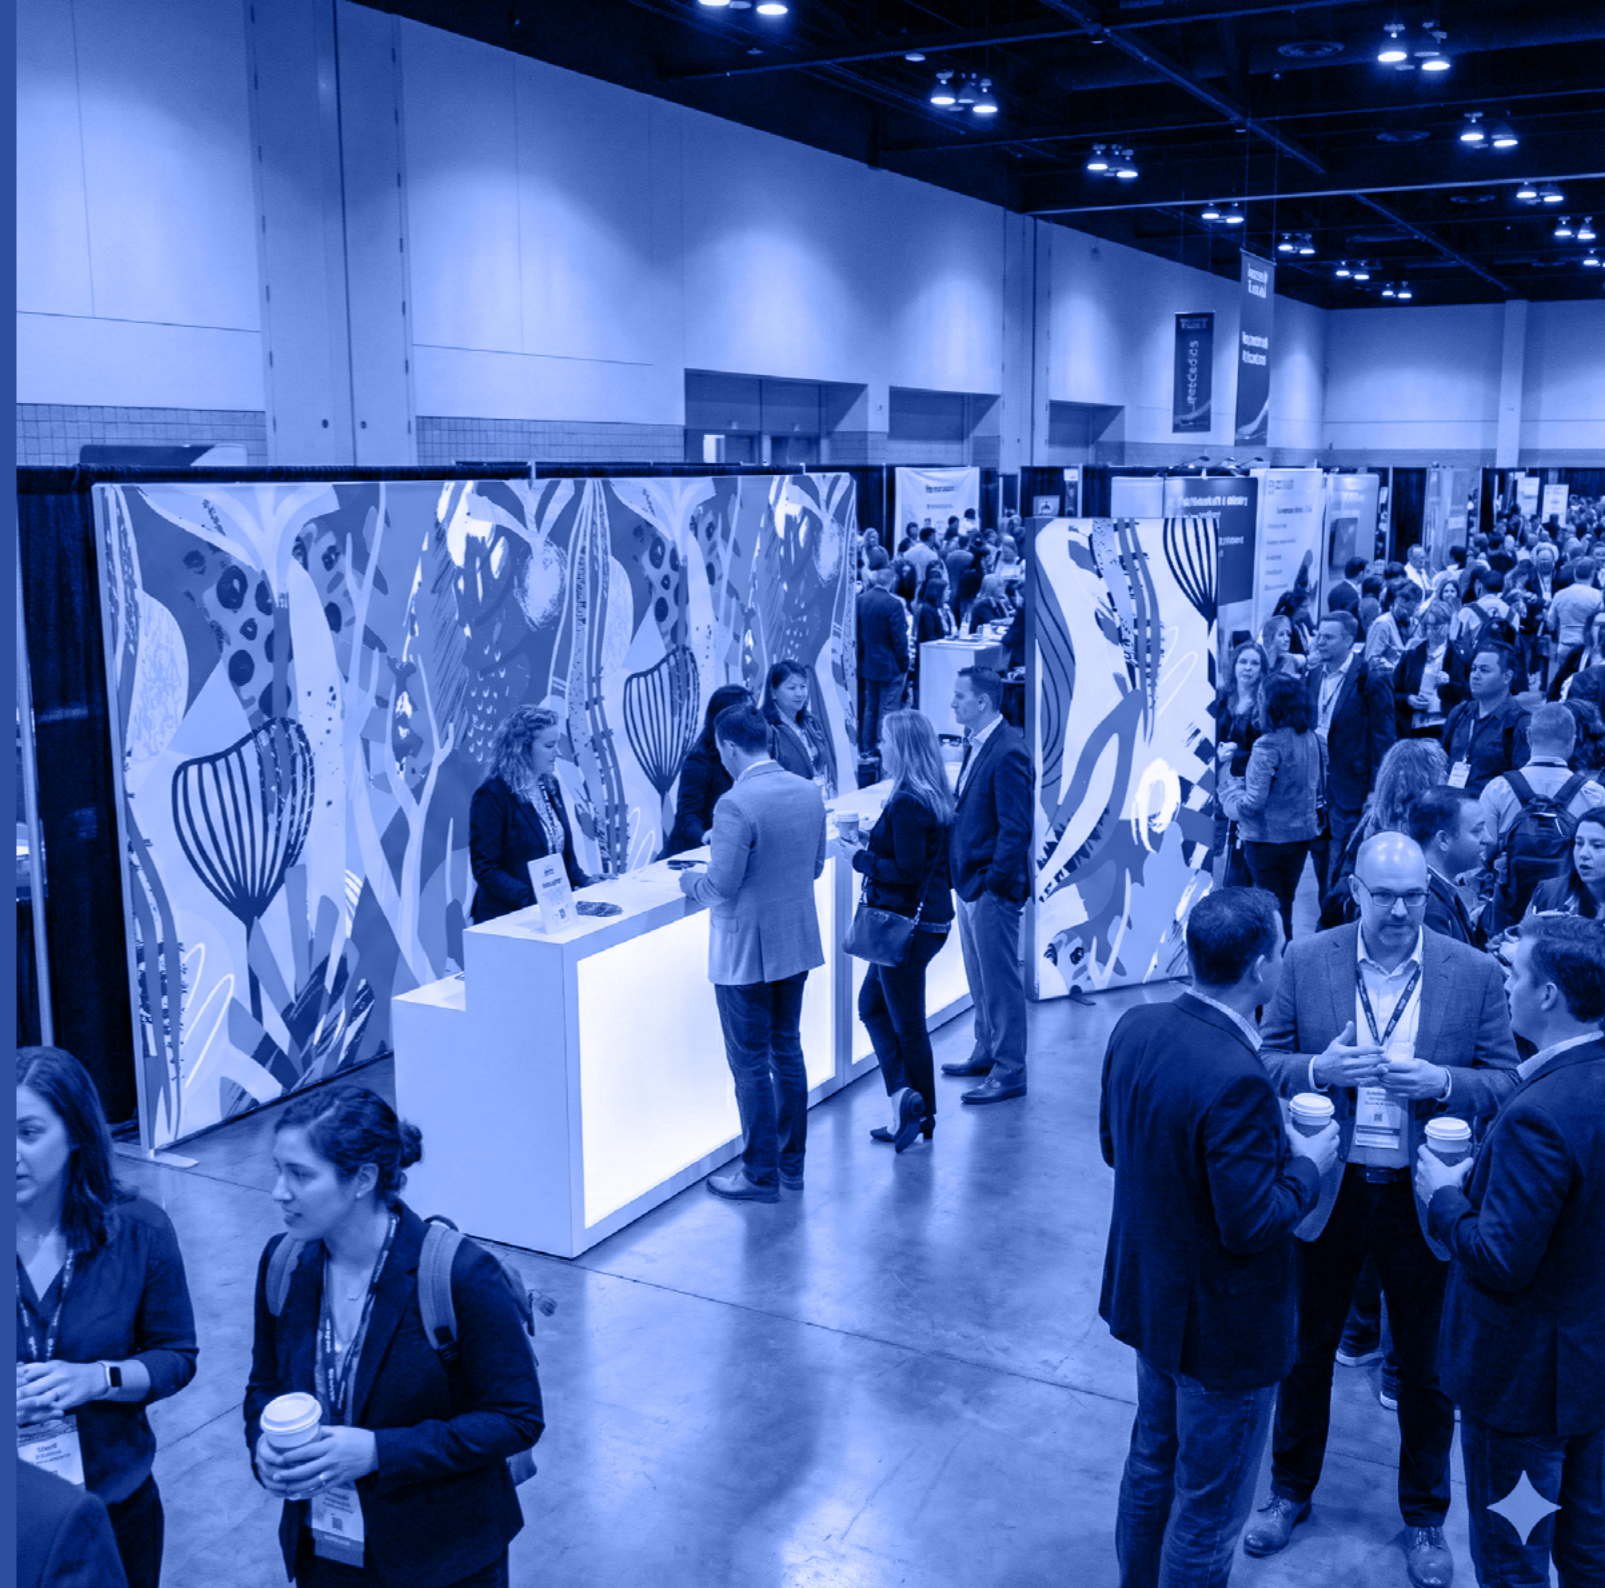

Advertising lightboxes are a multifunctional product that can be used as both free-standing and hanging advertisements. They can be printed on one or both sides and can be enhanced with visible LED lighting that attracts attention from afar. An additional advantage is the ability to change the graphics without the use of tools. Light boxes are very versatile and can be adapted to different environments and purposes. Textile advertising is a great way to draw the audience's attention to your brand.

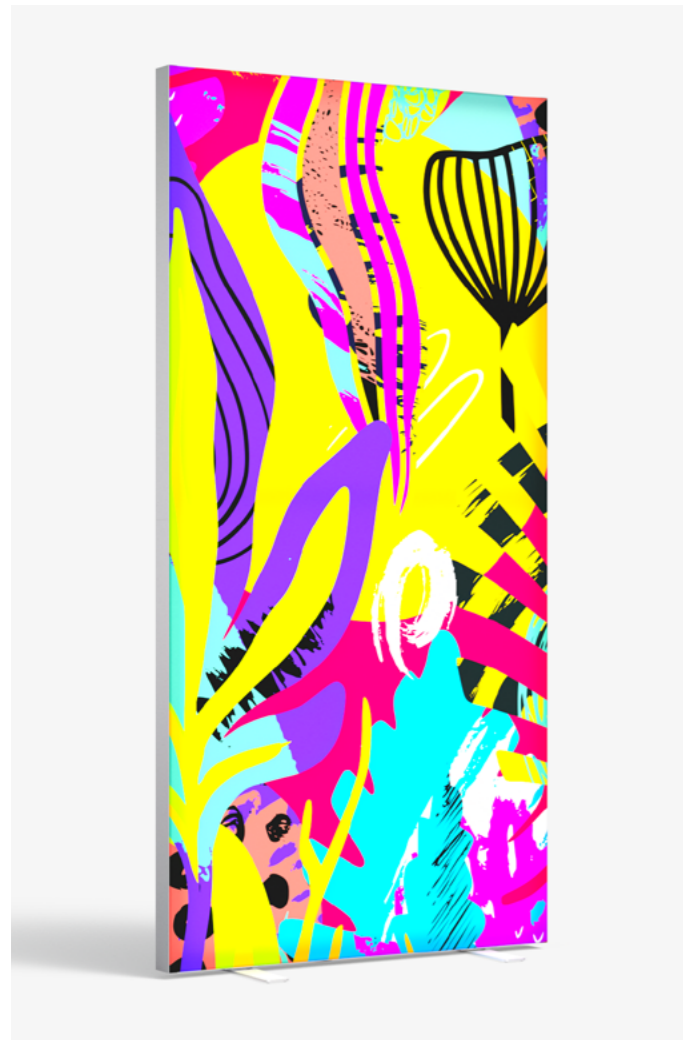

Applications:

- Trade shows
- Conventions & large events
- Interior design
- Showrooms decor
- Retail spaces

Perfect solution for:

- **Large companies and brands** that want to stand out at important events.
- **Small and medium-sized enterprises** looking for an economical and flexible advertising solution.
- **Advertising and marketing agencies** that can use lightboxes as a tool for promotional campaigns.
- **Event planners** who design attractive and functional exhibition spaces.
- **Retail stores**, where they can improve their store displays to attract customers.
- **Interior designers** who use them as impressive decorations for office spaces.

Textile frames

Advertising frames in the form of textile panels are a solution that will allow you to present your advertising message in a modern, impressive way and, importantly, without the need for complicated tools. These frames are designed to be both visually appealing and highly functional, making them ideal for a variety of spaces. Thanks to the easy installation system, attaching the frame to a wall, ceiling, or other surface of your choice takes only a few moments.

Applications:

- Retail spaces
- Home decor
- Office interiors
- Exhibitions and galleries
- Trade shows

Perfect solution for:

→ **Retailers and store owners** looking to improve the visual merchandising and display in their stores.

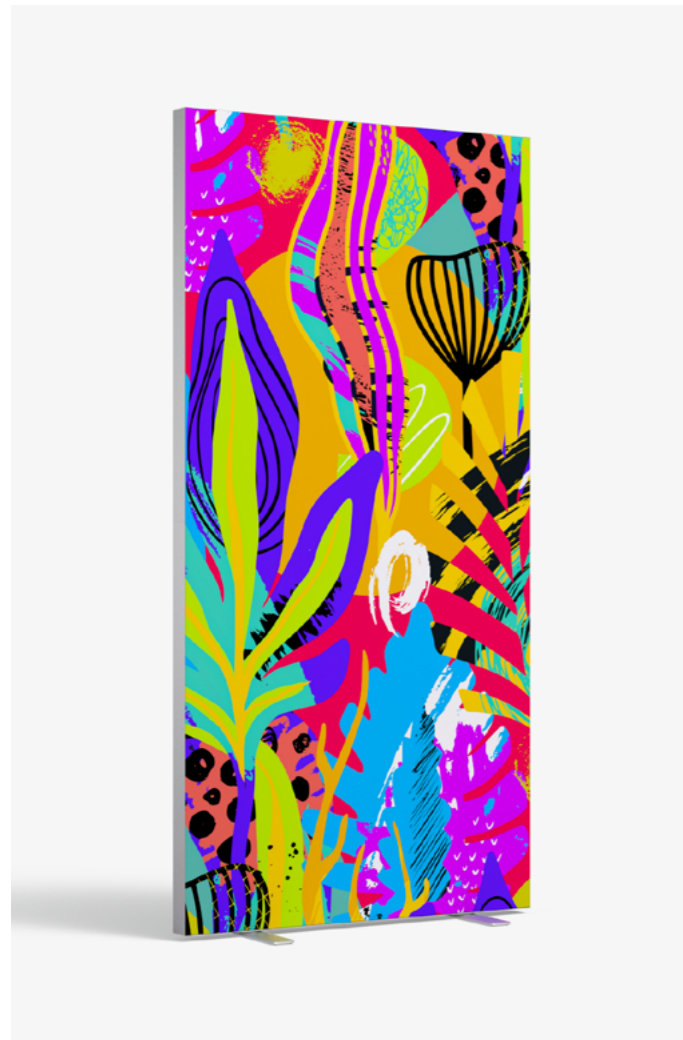

→ **Interior decorators** who focus on modern and stylish interior design elements.

→ **Offices and corporate spaces** that want to create an aesthetic working environment.

→ **Event organizers** looking for eye-catching and easy-to-change signage.

→ **Art galleries and museums** to display works of art or exhibitions in an elegant and modern way.

Counters & tasting stands

Promotional stands are an essential element of product promotion and tasting, effectively attracting the attention of customers and visitors at trade fairs, in retail stores, or offices. These stands serve as tools that encourage people to take an interest in the brand's offer. High-quality printing and visually appealing graphics are the key to successful advertising.

Applications

- Promotional events
- Product tastings
- Trade fairs
- Retail stores
- Corporate offices

Perfect solution for:

→ **Food and beverage brands** that want to create a convenient setting for product tasting and presentation.

→ **Marketing teams and brand managers:** improving promotional activities and campaigns.

→ **Retailers and store owners** who create engaging in-store promotional spaces.

→ **Event organizers** who want to create an attractive venue for promotional events.

→ **Corporate companies** that need systems to showcase their products and services.

Outdoor advertising

In summer and winter, some of the most useful promotional tools are tents, columns, gates, deck chairs, and flags. Our offer includes all these products in many different variants and configurations that you can tailor to your needs. All inflatable products use constant pressure technology, which means they do not need constant access to electricity. You can enjoy the unfolded and durable structure all day long. A single filling allows you to avoid the use of portable power sources, which generate additional costs and unnecessary noise.

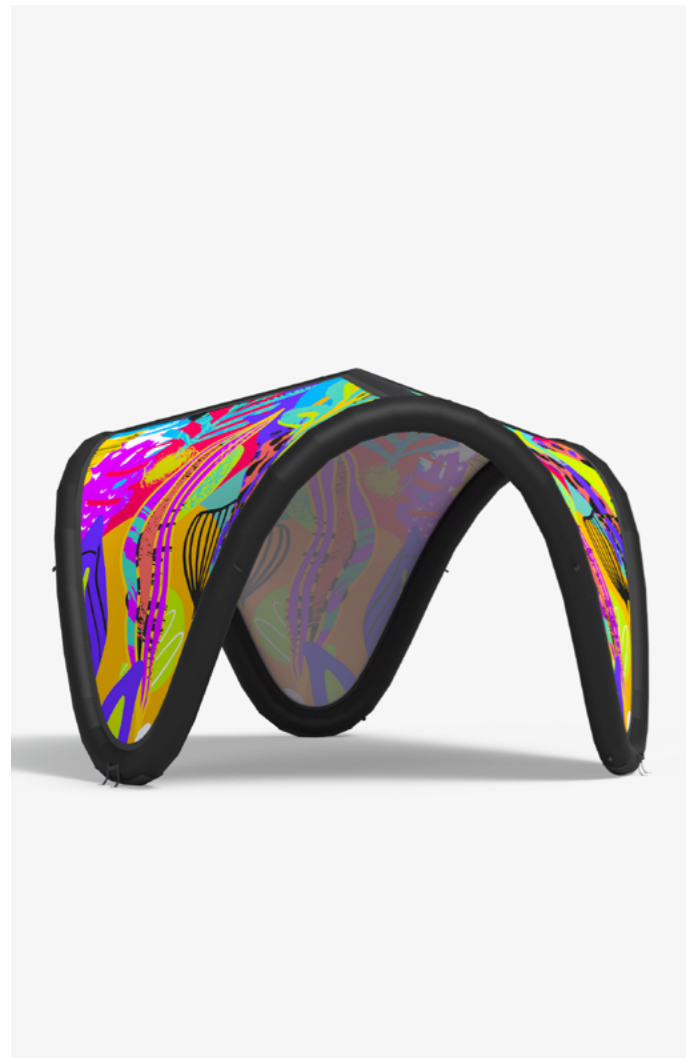

Applications:

- **Outdoor events**
- **Festivals and fairs**
- **Sports competitions**
- **Beach promotions**
- **Seasonal markets**

Perfect solution for:

- **Event organizers** who want to create visually appealing and functional outdoor spaces.
- **Sports teams and sponsors** who want to increase their brand visibility at competitions.
- **Festival organizers** looking for durable and configurable promotional solutions that will last for years.
- **Retailers and brands** conducting outdoor promotions.
- **Companies in the hotel and tourism industry (HoReCA)** who want to create comfortable chillout spaces.

-  Printing on textile
-  Sublimation printing method
-  PE inflatable construction

V Pavillon

advertising pavillon

● This advertising tent is a product designed to catch the eye. If you are planning a promotional event and want participants to notice your booth from afar, our inflatable tent will successfully fulfill this task. The product works well both indoors, for example, at trade shows and promotions in galleries, and outdoors, for example, at events and festivals.

- unique design
- inflatable spider construction
- the tent does not need to be connected to an air compressor (power supply)
- the design maintains constant pressure at all times
- the model has special safety and pressure equalisation valves
- no tools required for assembly and disassembly
- print in any colour on waterproof polyester fabric
- reusable system, multiple prints possible for one design

Roll-up

Roll-ups are one of the most versatile and popular tools for promoting products, services, and events. They are portable and easy to assemble, ideal for creating a basic stand. Whether used at trade shows, in-store promotions, or corporate events, roll-ups will draw attention to your brand. Their lightweight design makes them easy to transport and set up, and high-quality printing ensures that graphics are sharp and vivid.

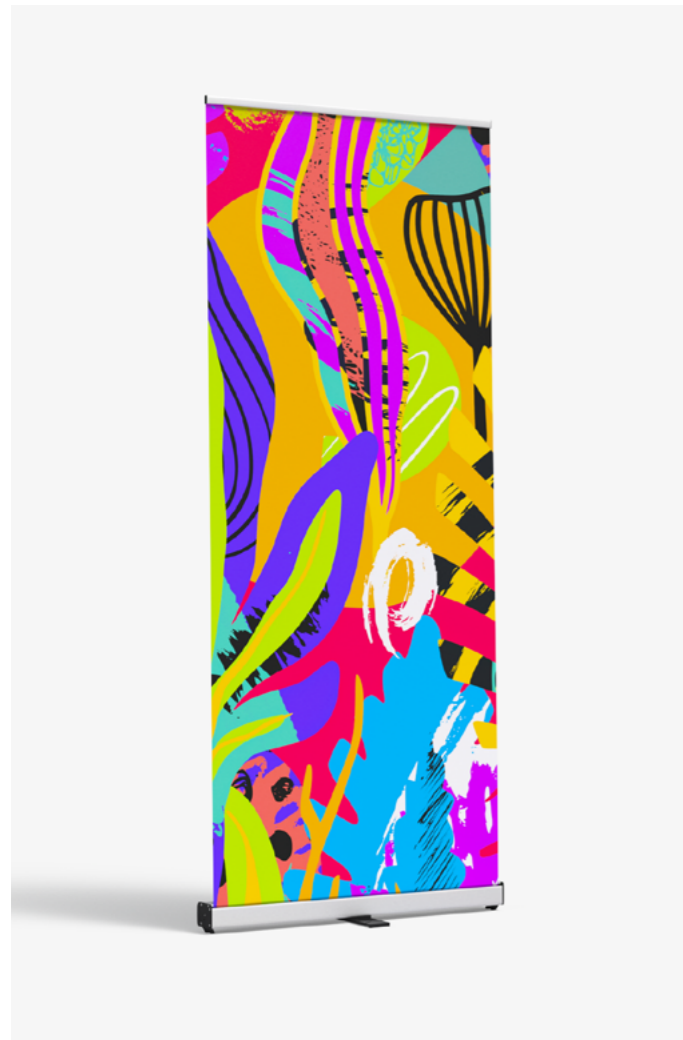

Applications:

- Trade shows
- Exhibitions
- In-store promotions
- Corporate events
- Conferences and seminars
- Product launches

Perfect solution for:

- **Public authorities and institutions** for communicating important information.
- **Event organizers** looking for lightweight and eye-catching signage for events and conferences.
- **Retailers** promoting products or conducting in-store sales.
- **Corporations** presenting brand information at meetings, presentations, and networking events.
- **Educational institutions** for presenting information at open houses, job fairs, and other academic events.

Multimedia advertising

LED-based advertising screens are becoming an increasingly common element of product, service, and event promotion. The Digital series models are ideal for those looking for bold and multimedia solutions. This category includes versatile tools that allow you to present content in an attractive and effective way. Digital media, LED screens, and advertising totems are perfect for providing information in offices, galleries, or any premises where people gather.

Applications:

- **Corporate offices**
- **Shopping malls and galleries**
- **Trade shows and exhibitions**
- **Public spaces**
- **Entertainment venues**

Perfect solution for:

→ **Public institutions** looking for options to provide visitors and the public with clear and attractive information.

→ **Art galleries and museums** looking for modern solutions in the field of interactive displays and information.

→ **Companies and corporations** looking to improve communication and brand visibility in offices and public spaces.

→ **Retailers and shopping centers** that want to create dynamic and engaging advertising messages.

→ **Event organizers** looking to provide impressive visual materials at conferences, exhibitions, and events.

Accessories & advertising stands

Accessories and brochure holders are essential components that improve and complete your promotional displays, ensuring that your marketing materials are organized, accessible, and presented in the best possible light. This category includes not only brochure holders and display accessories, but also a variety of practical items like towels, blankets, pumps, and lights designed to support and complement your promotional setups.

Brochure holders are available in a range of styles and configurations, making it easy to create a professional presentation. Additionally, towels and blankets can be customized with your branding, serving as both functional items and promotional giveaways at events.

Pumps and lights are essential tools for maintaining and improving inflatable displays and other promotional systems, ensuring that they are always properly inflated and ready for use.
