# FOR URBAN & OUTDOOR ADVENTURES QUALITY, DURABILITY, STYLE

At Victorinox, we are engineering an adventure, taking inspiration from our iconic Swiss Army Knife, our industrial roots and Switzerland's great outdoors. We highly value the excellence of Swiss craftsmanship, as well as the impressive expertise of our more than 2,000 employees worldwide.

Each Victorinox premium watch is developed and manufactured in our own factory in Delémont, Switzerland. Thanks to high-quality components and materials, and in compliance with strict testing standards, we provide our products with durability and an outstanding 5 Year Warranty +.

Limited edition watches and selected timepieces come in specially-designed packaging that, in different variations, houses both the watch and a matching pocket knife – a distinctive set only our brand can offer.

The principles by which we do business are as relevant today as they were in 1897 when our company founder, Karl Elsener, developed the "Original Swiss Army Knife": functionality, innovation, iconic design and uncompromising quality. Our continued commitment to these principles has allowed us to develop products that are not only extraordinary in design and quality, but also in their ability to serve as reliable companions for life's adventures, both great and small.

**Carl Elsener**  
CEO Victorinox

# HISTORY

First Cutlery Workshop

Founder Karl Elsener

Mother Victoria

*VICTORIA*

Carl Elsener, Chief Executive Officer

- 1884** Karl Elsener I opens a knife cutler's workshop in Ibach-Schwyz. His mother Victoria actively supports him in his endeavors.
- 1891** Karl Elsener I establishes the Association of Swiss Master Cutlers and delivers the first major supply of soldier's knives to the Swiss Army.
- 1897** The "Original Swiss Officer's and Sports Knife" is patented. It is known around the world today as the "Original Swiss Army Knife".
- 1909** In memoriam of his mother, Karl Elsener I chooses her first name Victoria as the brand name and registers the emblem with the cross and shield as a trademark. Today it is a registered trademark in over 120 countries.
- 1921** The invention of stainless steel (Inox) is a highly significant development for the cutlery industry. The combination of the two words "Inox" and "Victoria" results in today's company and brand name – Victorinox.
- 1931** Carl Elsener II introduces automation. In 1931, Brown Boveri is commissioned to set up the world's first all-electric hardening plant in Ibach. This guarantees that all knives are of a consistent high quality.
- 1945** US soldiers stationed in Europe after World War Two buy it in large quantities and it is a popular souvenir to take home.
- 1950** Carl Elsener III takes over the company management.
- 1977** The Original Swiss Army Knife becomes an exhibit for design at the Museum of Modern Art in New York.
- 1979** Transformation of sole proprietorship "Messerfabrik Karl Elsener" into the family-owned company "Victorinox AG".
- 1984** The company doubles its manufacturing and office space.
- 1989** Market entry for "Watches" under its Swiss Army brand in North America with its former U.S. sales partner.
- 1993** Opening of the first sales subsidiary in Japan.
- 1994** Establishment of Carl and Elise Elsener Gut Foundation with the mission to support national and international charitable projects.
- 1999** Market entry for "Travel Gear" with the American TRG Group as licensee.
- 2000** Establishment of the Victorinox Foundation which holds 90 % of the share capital of Victorinox AG. The remaining 10 % belong to the non-profit Carl and Elise Elsener-Gut Foundation.
- 2001** Launch of a clothing line in the U.S. and opening of the first Victorinox store in Soho, New York.
- 2005** Acquisition of the long-standing Swiss knife and watch manufacturer Wenger SA in Delémont. Wenger remains an independently operating subsidiary of Victorinox.

Nenad Mlinarevic, Swiss Chef and brand ambassador for household and professional knives

Watches since 1989

Travel Gear since 1999

Fragrances since 2007

2022: 125 Years SAK Anniversary

- 2007 Carl Elsener IV takes over the company management and further expands Victorinox as a global multi-product brand.  
Establishment of Victorinox Swiss Army Fragrance AG.
- 2008 Opening of the first European Victorinox flagship store in London.
- 2011 Opening of the Swiss Knife Valley Visitor Center in Brunnen, Switzerland.
- 2013 Integration of the Wenger knife business into the Victorinox brand.
- 2014 Acquisition of the travel gear business from previous licensee and establishment of the new business unit Victorinox Travel Gear AG.  
Opening of a store at a prime location in the city center of Zurich.
- 2016 Construction of the Watch Competence Center in Delémont, Switzerland.
- 2017 Discontinuation of Apparel to focus on the core product categories. Production of 500-millionth "Original Swiss Army Knife".
- 2020 Opening of the new distribution center in Seewen, Switzerland.  
Acquisition of Zena Swiss AG, traditional Swiss manufacturer of the economy peeler.  
Opening of first European Victorinox Franchise Store in Vienna
- 2022 125<sup>th</sup> Anniversary of the "Original Swiss Officer's and Sports Knife"

# SWISS MADE

Victorinox is an authentic Swiss brand with a strong history and heritage. The Swiss place great value on practicality; they take pride in innovation, quality and expertise.

We are no different. We ourselves want authentic, high-quality goods so that is what we make. If we need new ideas to get there we innovate, we collaborate until we have them. We do the job right and finish it properly, so we can take pride in our work, so it speaks for itself.

Located in the Swiss Jura, the Victorinox Watch Competence Center engineers, manufactures and assembles watches and watch components. The Center produces for Victorinox's own brands – Victorinox and Wenger – as well as for selected clients. For more than 130 years Victorinox has been developing its expertise in stainless steel, also known as inox steel, constantly improving product quality, process efficiency and cost effectiveness.

We make sure our products are reliable so that consumers can trust they are getting exactly what they want. For the office, the kitchen, the long-planned trip or the hike all the way up a mountain. Swissness and the active lifestyle of Swiss people are included in all products, so that customers will feel confident they are ready to face every day's adventure.

## VALUES OF AN AUTHENTIC SWISS BRAND

We make products the way we would like to have them ourselves. This means in outstanding Swiss quality, with solution-oriented functionality. We believe in innovation for smart, creative and contemporary products and services. And our no-frills iconic design is based on simple, distinctive and clean lines. Our Brand Values are defined by our promise to our customers, which describes how they will benefit from our products.

### QUALITY

is poured in every Victorinox Watch by the use of high-grade materials, rigorous quality testing, engineering and production in its own factory in Switzerland. And of course, all watches are Swiss Made.

### FUNCTIONALITY

is part of every Victorinox Watch in order to support the daily life adventure of its wearer as for example enhanced day and night readability on every watch.

### INNOVATION

is brought to Victorinox Watches amongst other by using innovative materials like carbon-composite for the case, genuine wood or American-made paracord for the straps.

### ICONIC DESIGN

is translated to Victorinox Watches by using the roots of the brand, the Swiss Army Knife, as design inspiration like for example a SAK shaped counter weigh for the second hand.

## JOURNEY 1884

# EMBARK ON A JOURNEY OF DISCOVERY

- ISO shock- and 200 m water-resistance (all models)
- ISO norm antimagnetic protection (quartz mvmt)
- Versatile tool-free changeable strap

Inspired by Switzerland's love of hiking, the Journey 1884 perfectly blends the spirit of the outdoors with its engineering DNA. The Swiss Army Knife-influenced counterweight and the engraved material code reflect its industrial heritage, which is underscored by the foundation date. Antishock and antimagnetic resistance ensure accuracy, and the easy-change strap adds versatility to its credentials list. High quality materials, clever design detailing and innovative functions make this an essential companion on life's big adventure.

# I.N.O.X. STRONG AND RESILIENT ADVENTURE COMPANIONS

- ISO shock- and water-resistance up to 200 m\*
- ISO norm antimagnetic protection (Quartz models)\*
- Tool-free changeable strap\*

There's nothing like the energizing freedom of escaping city life and being immersed in the forest. The I.N.O.X. range harnesses the feelings of balance and regeneration that come from stepping off life's treadmill for a moment. Designed with carved shapes and strong geometries, this collection features the iconic signature bezel and both quartz and mechanical movements. The use of stainless steel reflects Victorinox's roots in industrial craftsmanship, next to innovative, performance-focused materials like titanium and carbon. Pieced together in perfect harmony and precision, it's a watch that effortlessly fuses strength and elegance.

*\* Applies to selected models launched before September 2023 and all models launched after.*

- Super-LumiNova® ensures easy 24-hour readability
- Crown protection offers enhanced endurance

Blending iconic design with an innovative display technology, the FieldForce Collection is a force of its own. It's all about readability, with bold, distinct numerals and generously sized hands enhanced with Super-Luminova® for 24-hour, day-and-night clarity. Some models feature a GMT function that keeps track of dual time zones, while others offer high multifunctionality with chronograph and tachymeter functions. Every FieldForce piece exudes a confident, classic style, reflecting its distinguished Swiss Army Knife heritage.

## ALLIANCE

# CONFIDENCE AND SUBTLETY ACROSS THE LINE

- A classic and timeless companion
- Cases come in 28 mm up to 44 mm sizes
- Offers up to 100 m water resistance

The Alliance Collection is the strong, silent type, flying under the radar with quiet and complete confidence. This range fuses the very best of Victorinox design, technology and expertise, offering watches in a range of sizes and with traditional watch-making details such as pyramidal markers and models with automatic movement, or elegant, feminine models enhanced with glittering Swarovski crystals. Each piece in the collection is dynamic and decisive, making this the go-to choice for people who appreciate top quality, alluring timepieces.

**MAVERICK**

# FANCY DIVING-INSPIRED TIMEPIECES

- Classy and precise diving-inspired wristwatch
- Features rotating bezel with count-up scale
- Crown protection offers enhanced durability

The Maverick Collection captures the adventurous spirit of the deep-sea diver, where pinpoint timing is a matter of life and death. These stylish watches feature a unidirectional bezel – a function developed for divers to record exact underwater times, and now a mark of the explorer and pioneer, calibrating everyday challenges and tasks. Above or below the waves, the technically precise and visually stunning Maverick watch delivers control and precision to navigate modern life, and is enhanced with sapphire crystal for optimal endurance.

**AIRBOSS**

# **BOLD AND DARING MECHANICAL TIMEKEEPERS**

- Technical aviator look inspired by aeronauts
- Mechanical movements offer self-winding freedom
- See-through caseback shows mechanical workings

The Airboss Collection was created with reliability and precision as the main goal, and aeronautics in mind. Inspired by the aircraft carrier count-down commander whose job requires on-the-mark accuracy, this collection of mechanical watches blends classic charm with cutting edge design. Some models feature circular slide rules for easy time calculations that mark the beats of a busy, modern lifestyle. And with the exclusively Swiss-made automatic movement that works in harmony with arm motions, each piece creates a synergy between watch and wearer.

# STRAPS AND BRACELETS

## LEATHER

All Victorinox leather straps are specially cut, stitched and lined by expert craftsmen. Various tanning techniques provide different textures and feels for our cowhide or calfskin straps. We also ensure that none of the leather used in our straps is sourced from endangered species. It is always important to note that the colours and suppleness of leather are subject to change with time and exposure to external factors. Exposing it to daily showers or swims is not recommended. We recommend that customers who live a very active lifestyle, especially one involving frequent exposure to salt water and/or heavy perspiration, opt for a steel bracelet or rubber strap.

## STAINLESS STEEL

The 316L stainless steel alloy used in Victorinox bracelets has strong antimagnetic properties and is optimized for toughness and corrosion resistance.

## MILANESE MESH BRACELETS

Stainless steel Milanese mesh bracelets are flexible, thin and easy to adjust, enabling the owner to adapt the size of their own bracelet without the need for any specific tools.

## GENUINE RUBBER

Victorinox uses genuine high-grade rubber for its straps, a natural and extremely comfortable material with a silky finish that is as resistant to ageing as silicone.

### **BALLISTIC NYLON**

Some Victorinox models are equipped with ballistic nylon straps, which also features in our of most exclusive line of travel gear. It provides the ultimate in reliability and durability.

### **NATO INSPIRED STRAPS**

NATO, or the North Atlantic Treaty Organization, has clear links to the military world. Our NATO-inspired straps are made from a single piece of textile woven from extraresistant nylon fibre and cotton.

### **PARACORD STRAPS**

The paracord strap is original, innovative and unique. Hand-woven from genuine American-Made certified parachute cord (highly resistant, multistrand nylon cord), it is the ideal companion for every adventure and expedition. Paracord straps can be unwoven and used for as many purposes as the wearer can possibly imagine.

## **SBB (STRAPS & BRACELETS BASE)**

Our easy-to-use SBB references are available in our Media Centre and are regularly updated. This practical database enables you to find the strap reference your customer needs quickly (metal bracelet, leather, rubber, paracord or any of our available straps) and look up compatible straps for every watch SKU launched since 2005. Information about how to download a digital version from our Media Centre can be provided.

FIVE YEAR  
**5+**  
WARRANTY

# 5 YEAR WARRANTY +

Victorinox watches are covered by our five-year warranty +, which exceeds the industry average. The comprehensive processes implemented by our quality team makes it possible for us to offer this extended warranty. Victorinox watches are subjected to rigorous testing and numerous quality controls before they are distributed. This warranty offers specific legal rights; other rights may also apply that vary from state to state or country to country.

## ANYTIME SERVICE

We hope that customers never experience a problem with a Victorinox watch, but in the event of a functional defect covered by warranty, the consumer can follow the simple steps below to file a claim. For their convenience, we have a global network of authorized Repair Centers ready to provide service anywhere in the world. Consumers may also follow these same steps to request a repair not covered by warranty:

- Visit [victorinox.com](http://victorinox.com).
- Click on 'Stores'.
- Enter location and select 'Repair Centers' to locate an Authorized Repair Center.
- Contact the authorized Repair Center for assistance.

# PRODUCT TESTS

Our watches comply fully with both European ISO standards and the federation of the Swiss Watch Industry standards (NIHS). In addition, Victorinox has also introduced its own standards and internal tests. We self-monitor our production to make sure each stage is mastered perfectly and that our extensive certification controls are adhered to until delivery. Victorinox also certifies each component that is brought in from external suppliers. The Victorinox Quality Team conducts tests before certifying a design.

## CONFORMITY

Each component entering our production facility in Delémont, Switzerland is checked to verify its dimensions, aesthetics, interchangeability, and physical and chemical resistance to guarantee its impeccable quality. This process is developed by our quality team, who defines standards for each type of component. All this occurs even before the production of a watch begins, thus ensuring the process is fully integrated from the very start.

## MECHANICAL & QUARTZ MOVEMENTS

Movement endures stress and strain throughout its lifetime. To ensure all of our movements remain functional and accurate for as long as possible, Victorinox simulates watch wearing in its own quality lab to test every quartz, manual and automatic caliber in its watches.

## WATER RESISTANCE

Victorinox watch cases are hermetically sealed using high-grade rubber gaskets and screw-in case backs to ensure that the movements are not exposed to moisture or dust. In the manufacturing process, each watch is individually tested for water-resistance with ultra-precise machines.

## TEMPERATURE RESISTANCE

Heat chamber and humidity tests are performed on Victorinox watches to make sure they continue to function perfectly in the tropics. Low temperature tests are also conducted to check that the watch – and more specifically the mechanism – can withstand cold weather conditions.

## **CORROSION RESISTANCE**

Perspiration, chlorine, soap, seawater, air pollution: these and other environmental factors can damage a watch's components and materials. Victorinox performs tests to make sure the parts in its watches do not suffer wear or loss of mobility due to exposure to corrosive elements. Neutrality and skin sensitization tests are also conducted on all components that come into contact with skin, including cases and all types of bracelets.

## **UV RESISTANCE**

Intense light and sunlight can damage many materials used in watches, such as coatings, synthetic elements, rubber and leather. These materials are therefore rigorously tested to ensure their durability. Certification is only granted by our Quality Team if no signs of ageing are observed during these tests.

## **TRACTION/TORSION RESISTANCE**

Buckles on leather straps and clasps on steel bracelets must withstand constant use during a watch's lifetime. Victorinox submits all of its watches to traction and torsion tests, with a particular focus on attachment pins, to make sure they can resist accidental snagging and also that there be no breakage or damage to the bracelet.

## **VIBRATION RESISTANCE**

Everyday wrist movements and sports such as cycling, jogging, horseback riding or skiing can affect the performance, quality and accuracy of a watch. To prevent this, special machines put Victorinox watches through more severe vibrations than they would ever experience on even the most active of wrists. If a watch or any of its components does not survive this trial, it is not certified.

## **SHOCK RESISTANCE**

A number of severe shock-resistance tests are performed on Victorinox watches. Heavy impacts – such as the equivalent of a violent collision with a wall, for example – are reproduced in the lab. After absorbing the shock, we make sure that the movement is functional.

## **AGE RESISTANCE**

Victorinox watches are function-tested to simulate the ageing process. Moving parts such as push-pieces, crowns and bezels are turned and manipulated to replicate several years of normal use.

## **ABRASION RESISTANCE**

The Quality Team conducts intensive abrasion tests, particularly on cases, bracelets and straps, to make sure our watches can be worn in all situations without suffering premature wear during their lifetime.

## **VISUAL AND MANUAL TESTING**

In addition to these mechanical and chemical tests, every Victorinox watch is visually checked by a member of the Quality Team between each manufacturing stage to assure its overall quality according to our own Victorinox standards. If a watch does not pass this visual inspection, it is repaired or replaced. All watches that do not pass our quality check are discarded.

# CUSTOMER SERVICE

Keeping a Victorinox watch looking its best and working perfectly requires regular servicing. Only authorized Victorinox customer service centers are able to make sure the work carried out meets our standards of excellence.

- each watch sent to an authorized Victorinox service center is handled by a professional watchmaker.
- a diagnostic is performed and a detailed cost estimate made, free of charge (for watches that are no longer under warranty), which is submitted before any repairs are carried out.
- once the customer has accepted the cost estimate, our watchmakers carry out all the necessary procedures, including the replacement of any worn or defective components.

Victorinox guarantees the availability of spare parts for 10 years after production has ended. After servicing, the watch is returned the customer with a one-year warranty on the work carried out.

# MAINTENANCE SERVICES

As it endures daily life, skiing, watersports and sudden variations in temperature, a Victorinox watch requires care and maintenance to make sure it remains reliable and to deliver on its promise of accompanying its wearer on their everyday adventures.

Two types of servicing are available at any of our authorized Victorinox customer service centers.

Every two years, we recommend maintenance servicing. This will ensure that:

- the watch is completely water-resistant (it is dismantled, all the gaskets and the crown are replaced if necessary, the case is cleaned, etc.)
- the movement works correctly (the battery is changed in a quartz watch, mechanical movements are checked and adjusted)

Every six years, depending on the model of the watch, personal use and the local climate, we recommend a complete overhaul. This involves:

- a comprehensive revision of the movement (it is dismantled, the functions are checked, any worn component are replaced, etc).
- water-resistance and accuracy are also carefully verified.

# WATCH CARE TIPS

## OUR ADVICES FOR TAKING CARE OF A VICTORINOX WATCH

Like all quality products, Victorinox watches require attention and care. Following a few basic recommendations will protect the watch over time.

### WATER-RESISTANCE

To prevent the infiltration of water or dust, all watches (quartz or mechanical) should have their water-resistance checked every year by an authorized Victorinox service

center. We recommend having this test done before the summer or before going on vacation, as this is when watches are particularly exposed to water pressure and strong variations in temperature.

METERS	FEET	ATM	USAGE
50	165	5	Suitable for showering or swimming in shallow water
100	330	10	Suitable for swimming or snorkeling
200	660	20	Suitable for scuba diving
500	1650	50	Suitable for serious deep water diving

## HOW TO USE YOUR WATCH IN WATER

**Water resistance classification:** Watches are classified by their degree of water resistance. The water resistance information can be checked on the case back of the Victorinox watch; it refers to the water resistance table on this page.

**Water-resistance guarantee:** The water-resistance of the watch cannot be guaranteed indefinitely. The gaskets may age, crowns or pushers may receive knocks and changes in temperature may weaken water resistance. We recommend a water-resistance test every 18 months at an authorized Victorinox service center or at least every time the case of the watch is opened.

**Important:** Do not operate the pushers or the crown while your watch is underwater. Make sure both are properly pushed back or screwed down.

## MECHANICAL MOVEMENT (MAINTENANCE)

An automatic or hand-wound movement is a miniaturized engine running 24 hours a day, 7 days a week. To sustain its accuracy (between -2 and + 20 seconds per day), it needs regular maintenance and checking.

## CONDENSATION

A sudden change in temperature may cause condensation to appear beneath the crystal. This will not affect the watch's function and will soon disappear on its own. Nevertheless, it indicates a weakness in the watch's water-resistance and we strongly advise taking the watch to an authorized Victorinox service center.

## CLEANING

To preserve the attractive appearance of the watch, it should be washed in slightly soapy water, then rinsed in clean water and dried with a soft cloth. Soft toothbrush: A toothbrush may be also used to clean the watch. A brush with soft bristles should be used to avoid scratching the watch case or bracelet. Leather strap: To clean the leather strap, it should be rinsed under clean water then rubbed with a soft brush and a little soap. A soft cloth can be used to wipe it. Cleaned leather should be kept away from any source of heat while it's drying.

## STRAP CARE

Authentic Victorinox leather straps will last an average of 12 to 18 months, under normal conditions of use. This lifespan depends on various factors such as skin acidity, perspiration, contact with chemicals, weather conditions, climate and humidity. For instance, contact with water or any other liquid may cause the strap to wear prematurely. To keep the leather strap in a good condition, we recommend removing the watch for daily showering or swimming. If the user has a very active lifestyle, particularly involving frequent exposure to salt water or heavy perspiration, we recommend a steel bracelet or rubber strap. The color and suppleness of leather straps are subject to change with time and exposure to external elements

## SHOCKS

Impact, drops and repeated friction that could wear away the metal and affect the watch's mechanism should be avoided. We recommend removing the watch before playing sports such as tennis, squash or golf, and avoiding contact with chemical products, exposure to high temperatures and strong magnetic fields.

## TO AVOID

Do not set the date between 21:00 (9 pm) and 03:00 (3 am) when the date mechanism is in action. Be careful to not confuse noon and midnight. Do not expose to chemicals, solvents or gases as they can cause deterioration, discoloration and damage to the case. Do not apply any cosmetics or perfumes directly onto the case, leather strap or metal bracelet. Avoid high temperatures and strong magnetic fields.

## WHILE TRAVELING

Before a vacation: To prevent infiltration of water or dust, the watch needs to pass a water-resistance test during the last 18 months at an authorized Victorinox service center. At the airport: To protect the watch from magnetism, we advise removing the watch before going through security control.

VICTORINOX

# COMPONENTS AND MATERIALS

## STAINLESS STEEL

The 316L stainless steel alloy used in Victorinox cases and bracelets has strong anti-magnetic properties and is optimised for toughness and corrosion resistance. The 316L stainless steel we use complies with the nickel migration limits imposed by the European REACH Regulation.

## PVD (PHYSICAL VAPOR DEPOSITION)

Widely used in watchmaking, PVD is a high-performance, pollution-free and non-allergenic technology that is also employed by the aeronautic industry. The process involves adding a titanium coating to stainless steel by condensing a metal vapour in a partial vacuum, thus circumventing electrolytic and chemical processes. Victorinox also implements a special process for watches with hints of gold: a thin layer of gold powder is added after the surface is treated PVD, providing a longer-lasting finish than conventional gold-plating.

## SAPPHIRE CRYSTALS

All Victorinox watches are fitted with a scratch-resistant crystal glass cut from a polished slice of solid sapphire. Each

one is triple-coated with an anti-reflective treatment on the internal side for enhanced legibility.

## GENUINE MOTHER-OF-PEARL

Resilient and iridescent, genuine mother-of-pearl features in several Victorinox dial designs. Genuine mother-of-pearl is produced inside the shells of certain molluscs, meaning that each dial adorned with mother-of-pearl is utterly unique.

## BATTERIES

Victorinox equips its quartz watches with mercury-free batteries in compliance with global regulations and standards. This positive step towards environmental sustainability has no effect on either the precision or efficiency of a quartz watch. Each battery has an estimated lifespan of 2 years.

## LUMINESCENCE

This technology, branded as Super-LumiNova®, offers enhanced brightness in low-light conditions thanks to a non-radioactive and non-toxic substance. Victorinox uses Super-LumiNova® for any highly functional features of its watches, usually applying it to components such as the hands, numerals or bezel markers, etc.

# MOVEMENTS

All movements used in our watches are Swiss Made. We mainly use the following three suppliers:

## SELLITA:

A vital pillar of the Swiss watchmaking industry that was founded in 1950, SELLITA has a long tradition in the assembly, design and manufacture of quality mechanical movements. We use its movements for a variety of our mechanical watches.

## ETA:

ETA has over 200 years of experience in manufacturing quality movements. Its calibers are found in a selection of our mechanical watches.

## RONDA:

RONDA is one of the world's leading manufacturers of highly innovative, precision electronic watch movements, which form the foundation of many of our watches.

<b>Automatic Mechanical Movements</b>	<b>Sellita SW200-1</b> 38 hour power reserve 28'800 vibrations/hour (4 Hz) 26 jewels 11 1/2 lines Ø 25.60 mm	<b>ETA 2824-2</b> 38 hour power reserve 28'800 vibrations/hour (4 Hz) 25 jewels 11 1/2 lines Ø 25.60 mm	<b>ETA VALJOUX 7750</b> 48 hour power reserve 28'800 vibrations/hour (4 Hz) 25 jewels 13 ¼ lines Ø 30.00 mm
